

**CSE 304**  
**SQL Online – 2**  
**Set A**

- 1) Find employee id and hire date of all employees except those employees who are hired on the first hiring date or on the last hiring date in each department.
- 2) Find minimum salary in each department without using any aggregate function. Print minimum salary and department id. Sort the output according to department id.
- 3) Find last name, salary, job title and manager id of employees who get minimum salary working under the same manager.
- 4) Find employee name and department id of those employees who work in more than one department. You cannot use Join in the main query.
- 5) Find last name, hire date, salary and manager id of first three (03) employees for each manager.
